## DECLARATION

11 November 2008

REACH entered into force on 1 June 2007 and, as a result, we have noticed an increasing demand for information, which is often accompanied by various forms and questionnaires.

In this letter we would like to inform you about Magpaint Europe bv activities so far.

Magpaint Europe is well prepared for REACH and by December 1, 2008 our suppliers will be pre-registering all chemical substances we use in our product. This allows our suppliers and us to benefit from the transitional periods for the registration of substances and ensures that there will be no disruptions in the supply and marketing.

We shall be cooperating in particular with our suppliers to ensure that our raw materials are covered by REACH and that our production processes will therefore not be affected. As from December first when the pre-registration period has expired, we shall be using only raw materials in conformity with REACH (pre-registration by manufacturer / importer).

At the moment our product doesn't contain components that are listed for authorisation ([http://echa.europa.eu/chem\\_data/candidate\\_list\\_table\\_en.asp](http://echa.europa.eu/chem_data/candidate_list_table_en.asp)). We don't expect it, but when after a change in the candidate list one of our substances is listed we will inform you within 45 days.

Angélique Schepers  
General Manager
